ASSESSMENT GRID: YEAR 7 SCIENCE SOCRATES 2025 | OUTCOME STATEMENTS

Course Outcomes	
SC4-1VA	Appreciates the importance of science in their lives and the role of scientific inquiry in increasing understanding of the world around them
SC4-2VA	Shows a willingness to engage in finding solutions to science-related personal, social and global issues, including shaping sustainable futures
SC4-3VA	Demonstrates confidence in making reasoned, evidence-based decisions about the current and future use and influence of science and technology, including ethical considerations
SC4-4WS	Identifies questions and problems that can be tested or researched and makes predictions based on scientific knowledge
SC4-5WS	Collaboratively and individually produces a plan to investigate questions and problems
SC4-6WS	Follows a sequence of instructions to safely undertake a range of investigation types, collaboratively and individually
SC4-7WS	Processes and analyses data from a first-hand investigation and secondary sources to identify trends, patterns and relationships, and draw conclusions
SC4-8WS	Selects and uses appropriate strategies, understanding and skills to produce creative and plausible solutions to identified problems
SC4-9WS	Presents science ideas, findings and information to a given audience using appropriate scientific language, text types and representations
SC4-10PW	Describes the action of unbalanced forces in everyday situations
SC4-11PW	Discusses how scientific understanding and technological developments have contributed to finding solutions to problems involving energy transfers and transformations
SC4-12ES	Describes the dynamic nature of models, theories and laws in developing scientific understanding of the Earth and solar system
SC4-13ES	Explains how advances in scientific understanding of processes that occur within and on the Earth, influence the choices people make about resource use and management
SC4-14LW	Relates the structure and function of living things to their classification, survival and reproduction
SC4-15LW	Explains how new biological evidence changes people's understanding of the world
SC4-16CW	Describes the observed properties and behaviour of matter, using scientific models and theories about the motion and arrangement of particles
SC4-17CW	Explains how scientific understanding of, and discoveries about, the properties of elements, compounds and mixtures relate to their uses in everyday life
